

## Contemporary Implant Dentistry - The UConn Way

Join us for a presentation from the faculty of the new Center for Implant and Reconstructive Dentistry at the University of Connecticut Health Center. This program is designed to give practitioners an understanding of the new age in implant technology and proven restorative procedures.

### Topics to be presented:

- 3D ConeBeam scanning
- Loading protocols
- Essential tools to communicate with surgeons & laboratories
- New titanium alloy – smaller implants and less grafting needed
- Treating high risk patients
- When to use customized abutments
- Success and profitability with solid abutments

Learn how the Center for Implant and Reconstructive Dentistry at the University of Connecticut Health Center provides optimum care for dental implant patients.

**Date: Tuesday, April 7, 2009**

Courtyard Marriot  
New Haven/Wallingford
